## CENTRIFUGES FOR DRILLING & WASTE MANAGEMENT

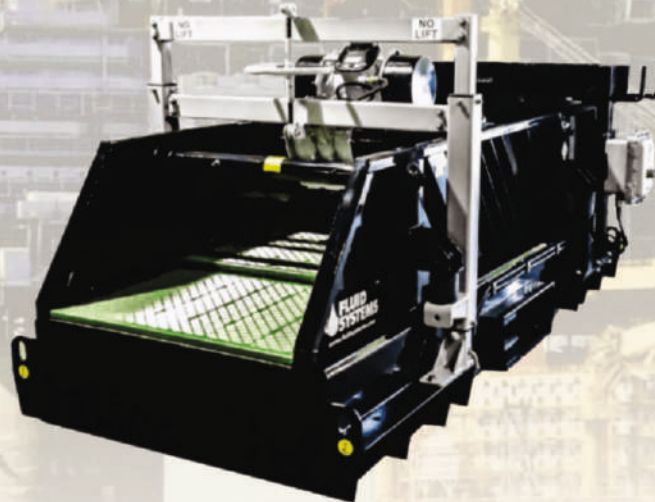

Centrifuges ensure efficient solid-liquid separation, optimizing drilling fluid recovery. Designed for durability and high performance, they minimize waste and enhance efficiency in demanding oil and gas operations.

### **FEATURES :**

- Efficient Separation – Optimizes drilling fluid recovery with superior solid-liquid separation
- Rugged Durability – Built with high-quality materials for extreme oilfield conditions
- Enhanced Performance – Reduces waste, downtime, and improves operational efficiency
- Versatile Applications – Suitable for drilling, production, and various oil & gas processes
- Cost-Effective & Sustainable – Lowers operational costs while supporting eco-friendly practices

## CUTTING DRIERS / DRYING SHAKERS FOR OIL AND GAS DRILLING & WASTE MANAGEMENT

Cutting driers manufactured by FSI in India are designed for the Oil & Gas industry to efficiently recover drilling fluids from cuttings. Engineered for high performance and durability, they reduce waste, lower operational costs, and enhance environmental compliance in demanding drilling environments.

### **FEATURES :**

- |                            |                             |
|----------------------------|-----------------------------|
| ● 34.sq.ft. Screening area | ● Rugged & reliable         |
| ● Dry cuttings             | ● High performance          |
| ● Less fluid wastes        | ● Low maintenance           |
| ● More recovery of fluids  | ● Quick screen panel change |
| ● Simple design            | ● Small footprint           |
