HYDRO CYCLONES

Hydro cyclones are designed for the Oil & Gas and Underground Construction Industry. These advanced separators utilize centrifugal force to remove solids from drilling fluids, enhancing fluid quality and operational efficiency.

FEATURES :

- Made from high wear-resistant polyurethane
- High-capacity cone engineered to minimize plugging
- 511 GPM each at 75 FT of head
- 40 to 100 microns separation
- Damped in volute inlet minimizes turbulence
- Reduces mud loss with adjustable and interchangeable apex sizes
- Grooved feed and discharge connections
