SLURRY SEPARATION UNITS

FSI slurry separation units manufactured in India are designed for efficient solid-liquid separation, making them ideal for Mining and Construction industries. These systems enhance fluid management by effectively removing solid particles from slurry, ensuring improved operational efficiency.

FEATURES :

- 48' triple axle drop deck trailer with air ride and leveling jacks
- OSHA-approved handrails and stairs for safety
- Insulated control room/lab for all-weather operation
- FS2101 centrifuge (21" bowl, 90" length, 150 HP main drive)
- Processes up to 24 cu. yards of drilled solids per hour
- High-performance pumps for efficient fluid transfer
- 16" screw conveyor with hydraulic or explosion-proof motor
- LED explosion-proof lights for safe operation
